

To our customers and partners

As part of an ongoing co-ordination within the **EMG** industrial group, **Vestfold Engineering AS** changes name to **Norautron Solutions AS**.

At the same time, **EMG**'s Swedish subsidiary **Elektronik Partner AB** changes name to **Norautron AB**.

The following companies form part of the **EMG** group's Electronic Manufacturing Services (EMS):

Norautron AS in Horten Norway, **Norautron AB**, in Vänersborg Sweden, **Norautron Souzhou Co., Ltd.** in China, and **Norautron Solutions AS** in Horten Norway.

As a result of the changes of names, all EMS (electronic Manufacturing Services) member companies will hereafter appear with a common and clear profile.

All announced changes take effect from October 1st.

Vestfold Engineering AS was established in 1988. 10 years later, in 1998, the company was taken over by the **EMG** Group.

During the recent years, the centre of attention in various projects has involved and has been related to wireless communication of data and/or measured values from a variety of different sensors and transducers.

Norautron Solutions AS owns a high level of competence after many years of activity within development of modern electronic circuitry.

Our range of services includes the entire range from performing concept studies to bring out final products and/or entire systems, all of them duly documented for manufacture and distribution on the market.

In addition, **Norautron Solutions AS** is a considerable supplier of Printed Circuit Boards design and layout (PCB).

Additional information can be found on <http://www.nasolutions.no/>

Please note that, except for the change of name, the company remains the same, as is the company registration code.

Norautron Solutions AS
